Mid Atlantic Propane Gas Association Committees

Committees are the backbone of the Mid Atlantic Propane Gas Association and your volunteer efforts and involvement with a committee ensure the association's long-term viability. The committees are actively working to benefit and promote the propane industry in Maryland and Delaware. We welcome and encourage you to review the following list of committees and check the box next to the committee(s) on which you would like to serve. Please make sure to fill out your name, address, and contact information.

- Legislative / Political Action Committee (PAC)** – Develop legislative agendas and work with association lobbyists to advocate the best interests of the industry in front of the Delaware and Maryland State legislatures. Raise PAC funds and contribute to candidates who are friendly to the interests of the propane industry.
- Market Development Committee** – Develop marketing and consumer education programs to promote the growth of safe and efficient uses of propane as the preferred energy source.
- Membership & Programs Committee** – Generate interest and increase participation of current members, recruit new members, and offer programs and speakers that are interesting and pertinent to the membership.
- Education & Safety Committee** – Develop annual CETP safety & training calendar to serve the needs of member companies. Encourage the use of safety and education materials available through PERC. Provide outreach to propane emergency first responders.
